Summary

Software Developer with hands-on experience in full-stack web and mobile development using React.js, Node.js, and React Native. Proven ability to build scalable backend systems and intuitive user interfaces. Passionate about clean code, performance optimization, and user-centered design.

Education

Silliman University

Graduate May 2025

Bachelor of Science in Information Technology

Work Experience

Sites at Scale - Intern

January – April 2025

- Design and build websites using WordPress, customizing themes and layouts to meet project requirements.
 - Implement responsive UI designs and ensure cross-browser compatibility.
 - Optimize site performance and handle basic troubleshooting and content updates.
-

Projects

ICB-GYM Assistant App - Backend Developer

Web Application

- Developed a web application offering personalized workout and diet plans, used by over **120 gym members** during live testing.
 - Designed and deployed a scalable backend using **Node.js**, with **real-time data sync** powered by **Supabase**, maintaining **99.5% uptime** across three months.
 - Built and secured **15+ RESTful APIs** supporting user authentication, profile management, trainer recommendations, and gym operations.
 - Collaborated on a responsive frontend with **Next.js**, resulting in a **30% improvement** in navigation speed and a noticeable boost in overall user engagement (based on feedback and test session tracking).
-

FundFlow – Fullstack Developer

Mobile Application

- Developed a mobile app using **React Native** to help **barangay and SK officers** track event expenses and monitor total balances.
- Built a lightweight backend with **Node.js** and **SQLite**, handling **200+ transactions** during testing.
- Implemented real-time balance updates and a simple expense tracker, reducing manual errors by **30%** (based on user feedback).

Technical Skills

- Languages: JavaScript, TypeScript, C, C++, Java, PHP, SQL
- Frameworks & Libraries: React.js, React Native, Angular, Laravel, Next.js
- Tools & Platforms: Git, GitHub, Postman, WordPress, npm
